[December 2011 Progress Report.pdf](#)  
[Tank sampling field notes.doc](#)

---

Gary,

I've attached a few documents that will provide you with all the information that you need. The "Tank sampling field notes" document was performed in 2004 to gauge the amount of liquid in the tanks then, so use that document only to get the height, diameter and volume of the tanks.

The "Falcon Refinery Tank Info (May 2011)" spreadsheet describes the waste amounts at that time. And the "December 2011 Progress Report" is the last progress report we prepared for the site and describes the movement of waste from tank to tank.

I've been disappointed that the project went the way that it did, there was never enough money. In fact we still haven't been paid in full and despite legal actions.

Hope you're doing well, let me know if you need more stuff.

**Steve:**

**Hope you are doing well.**

**Any chance you can help me complete the attached spreadsheet? I am trying to get more tank information to try to estimate disposal costs.**

**Thanks**
